

Kanaru Sasaki

Front-End Web Developer

Summary

I am a front-end web developer mainly using Next.js and TypeScript, and I am looking for remote contract work in English-speaking countries. I am currently working remotely on a team and have received positive feedback for being easy to collaborate with. My first language is Japanese, but I can communicate without any problems through text.

Experience

Front-End Web Developer

June 2022 - Present | Remote, Japan

- Developed and maintained a website with forms using Next.js and TypeScript.
- created test code that runs on CI on GitLab using Jest and Cypress.
- Replaced CSS written in SASS with TailwindCSS.

Back-End Web Developer

February 2021 - September 2021 | Miyagi, Japan

- Developed and maintained the backend of an e-commerce site using PHP, Zend Framework and SQL.
- Debugged and resolved issues in an e-commerce website
