Kanaru Sasaki

Front-End Web Developer

Summary

I have two years of experience as an web developer. During the first year, I developed the back end of a E-commerce using PHP, while in the past year, I developed the front end of an affiliate site using TypeScript and Next.JS.
And I have a strong understanding of JavaScript's asynchronous process, integration with REST and GraphQL, test implementation using Jest and Cypress, etc. So, I can quickly contribute to development tasks.

Experiences

Front-End   June 2022 - Present | Remote, Japan

- Developing an affiliate site using TypeScript and Next.JS.
- Implementing test code using Jest, Cypress, and Storybook.
- Conducting code reviews on GitLab Merge Requests.
- Collaborating with backend developers to implement GraphQL.
- Collaborating with designers using Figma.

Back-End   February 2021 - September 2021 | Miyagi, Japan

- Developed an E-commerce system using PHP, ZendFramework, and SQL.
- Developed a logistics system using C# and .NET Framework.
